

We offer Floating PV consultancy to optimize
your system and reduce levelized
costs of energy

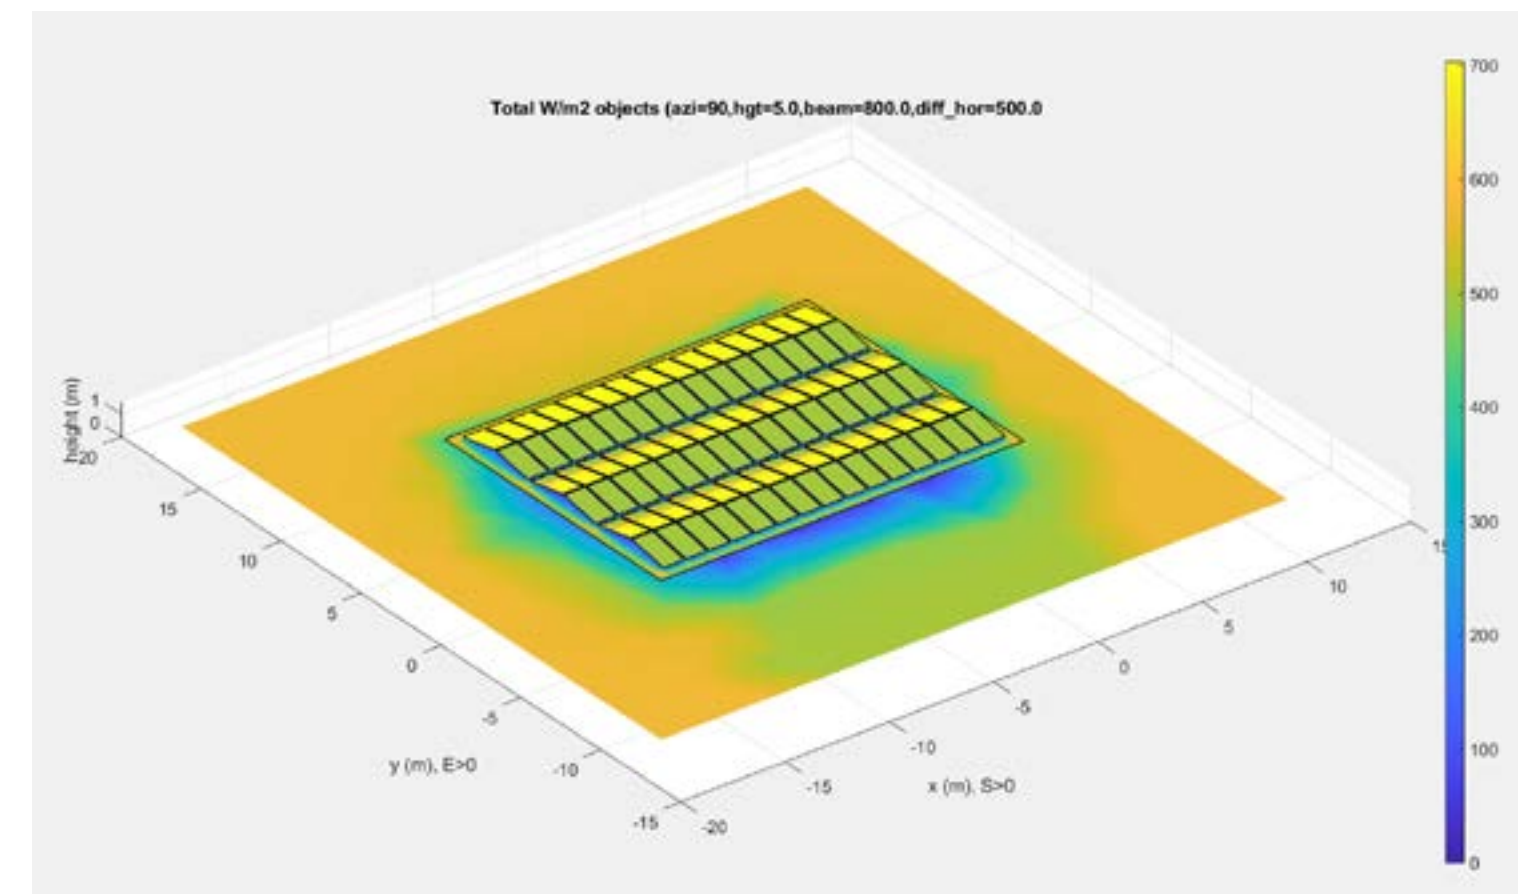

How can we assist you?

- ☛ Starting with the Development, we will guide you through all phases of your project up to Operation & Maintenance.

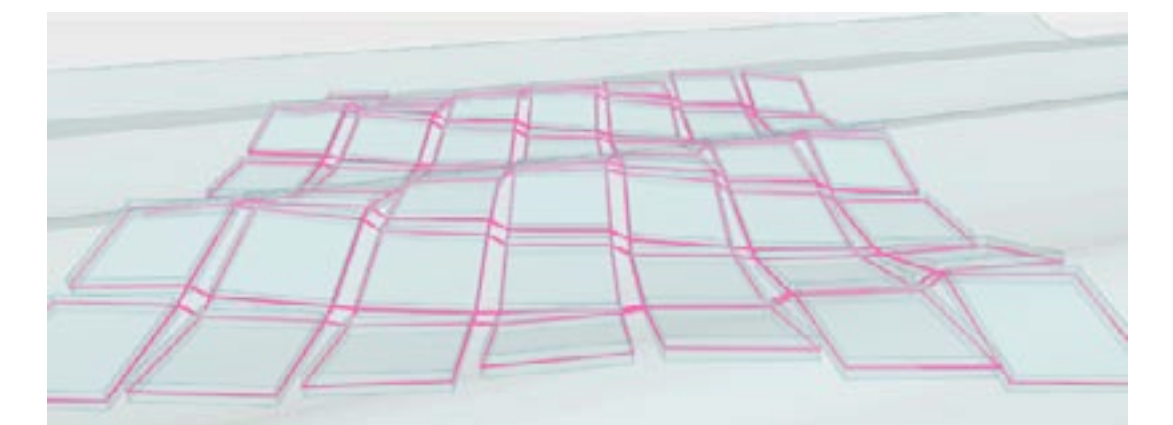

Structural Reviews

- ☛ We perform the structural review of your FPV system so you can be sure about its safety and condition.
- ☛ The development and optimization of the strategy for the anchoring system of your FPV panels is one of our key services.

Simulation of energy performance of Floating PV

Wave simulation

Custom FPV for K2-Systems

- ☛ Support during form finding of floats, during optimization of the structural design, shape and connector design to develop customized floats for K2-Systems and enter the market.
- ☛ „sbp sonne has advanced our FPV technologies to a whole new level!“
Katharina David, Managing Director at K2 Systems
